TECHNICAL PROJECTS

MovieViewer [source code](#)

An app for creating & organizing movie lists that pulls information from the OMBd API.

- { } Developed using Ruby on Rails and PostgreSQL
- { } Integrated search functionality to pull movie information from the OMDb API
- { } Utilized the Bootstrap v4 CSS Framework to implement a clean, efficient UI
- { } Allows users to organize movies, create lists, provide user ratings, & save movies

TV/Movie Tracker [source code Client](#) || [source code API](#)

An organizational app for your recently watched episodes of your favorite TV shows or movies.

- { } Developed using the React Javascript library for a clean UI
- { } Built custom Rails API backend for use within the application
- { } Implemented Redux to predictably maintain the application's state
- { } Used the Materialize CSS Framework to produce a modern, responsive design

EMPLOYMENT HISTORY

Software Engineer @ Processly

January 2019 - present // Pittsburgh, PA

- { } Write modern, performant and maintainable code for our infinite whiteboard application
- { } Utilize a variety of different languages & frameworks including Ruby, Ruby on Rails, Javascript and PaperJS
- { } Work closely with the designers and management team to design and maintain major features to ensure thoughtful and coherent user experience across our application

Business Analyst @ Home Serv Delivery

October 2016 - present // Pittsburgh, PA

- { } Train delivery vendors around the country on our DART software system in order to ensure efficiency in payment processing
- { } Deliver real time status updates via our mobile app to all major airlines on the delivery progress of their delayed baggage
- { } Increase on-time deliveries for every major western US market
- { } Utilize mediation, problem-solving, time-management skills and flexibility to meet the needs of the company and promote client satisfaction

Social Studies Teacher @ Rittman Middle School

August 2014 - August 2016 // Rittman, OH

- { } Built and taught year-long curriculum to ensure continued growth at higher levels
- { } Measured student growth through State Learning Objectives with 84% of students exceeding measured growth targets

AP Psychology Teacher @ Shelby High School

May 2013 - August 2014 // Shelby, NC

- { } Built a curriculum to prepare students for the AP test, with 90% of students scoring a 3 or higher

EDUCATION

Flatiron School

2018 // Online Immersive

Full stack software development bootcamp specializing in Ruby, Javascript, Ruby on Rails & React

University of Mount Union
